Excerpt from Division of Research Services, Fy 1989 Annual Report The support of the nih Biotechnology Unit (pilot Plant) continues by providing ongoing assistance and incorporating new systems and equipment for data acquisition, process control, and data analysis for production and fermentation research. In addition to the initial purpose of testing schizophrenics, and more recently the family members of schizophrenics, the system is being used to study the effects of aids on the ability to track moving targets. There are now two labs in the nimh that are using these systems, as well as St. Elizabeths Hospital. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
